BETTER BRAKE PADS COMPOUNDS FOR COMPETITION MEJORES COMPUESTOS DE PASTILLAS DE FRENO PARA COMPETIR

COMPOUND G1300 (2.0)

Last generation sintered compound designed for competition: Great initial deceleration with a powerful start and a progressive final braking performance. Great for riders who like a strong braking at the start and a solid lever feel. It works on all temperatures and in all conditions. These brake pads are not particularly aggressive on brake discs and offer a reduced wear level. Use in MotoGP (no carbon discs), Moto 2, Moto 3, WSBK, Superstock 1000, Supersport, etc.

Compuesto sinterizado de última generación especialmente desarrollado para competición. Gran deceleración inicial, con una entrada muy potente y un final de frenada progresivo. Muy estable durante toda la carrera. Ideal para pilotos que gustan de una enérgica frenada inicial y un tacto muy firme en la maneta. Funciona a cualquier temperatura y bajo todo tipo de condiciones. Pastilla no especialmente agresiva con el disco y con un nivel de consumo reducido. Para MotoGP (no carbon discs), Moto 2, Moto 3, WSBK, Superstock 1000, Supersport, etc.
