BRAKE DISCS

Classic **THE ROUND**

REF
V

REF
FLV

Galfer round discs are the most classic in terms of their appearance, they are the perfect replacement to maintain the original aesthetics, and they are characterized by excellent corrosion resistance. They are made of high-carbon stainless steel, and in the case of the floating ones, the core is stainless steel (AISI 420).

Los discos Galfer redondos son los más clásicos en cuanto a su apariencia, son el recambio perfecto para mantener la estética original y se caracterizan por una excelente resistencia a la corrosión. Están fabricados en acero inoxidable de alto contenido en carbono y, en el caso de los flotantes, el núcleo es de acero inoxidable (AISI 420).

I dischi Galfer rotondi sono i più classici per quanto riguarda la loro estetica, sono la perfetta sostituzione per mantenere l'estetica originale e si caratterizzano per un'eccellente resistenza alla corrosione. Sono realizzati in acciaio inossidabile ad alto tenore di carbonio e, nel caso dei dischi flottanti, il nucleo è in acciaio inossidabile (AISI 420).

BRAKE DISCS

Disc Wave®

THE GENUINE

REF
W

REF
FLW/CW

Galfer Disc Wave® discs are the most popular on the catalog. Thanks to their larger brake track perimeter, they enhance cooling capacity and allow for even wear of the brake pads. They undergo a cathodic electrocoating treatment to prevent corrosion. In the case of floating discs, they offer an improvement in weight reduction, and there are two variants: those with a high-strength anodized aluminum center (7075 T6 - 6082 T6) and those with a steel core (AISI 420).

Los discos Galfer Disc Wave® son los más populares del catálogo. Gracias a su mayor perímetro en la pista de freno aumenta su capacidad de refrigeración y permite un desgaste uniforme de las pastillas. Reciben un tratamiento de cataforesis para evitar la corrosión. En el caso de los discos flotantes, ofrecen una mejora en cuanto a la reducción de peso y existen dos variantes: aquellos con un centro de aluminio anodizado de alta resistencia (7075 T6 - 6082 T6) y aquellos con núcleo de acero (AISI 420).

I dischi Galfer Disc Wave® sono i più popolari nel catalogo. Grazie al loro maggiore perimetro sulla pista del freno, migliorano la capacità di raffreddamento e consentono un'usura uniforme delle pastiglie dei freni. Vengono sottoposti a un trattamento di elettrodeposizione catodica per prevenire la corrosione. Nel caso dei dischi flottanti, offrono un miglioramento nella riduzione del peso e ci sono due varianti: quelli con un centro in alluminio anodizzato ad alta resistenza (7075 T6 - 6082 T6) e quelli con un nucleo in acciaio (AISI 420).

BRAKE DISCS

SKULL

THE RADIKAL

REF
RH

REF
FRH

Galfer Skull discs are of original design and feature custom skull motifs. They are designed for those who want to take the aesthetics of their customized motorcycle to the most extreme level. Available in a floating version, like their other variants, they come with an anti-corrosion treatment and are made of stainless steel (AISI 420).

Los discos Galfer Skull son de diseño propio y están personalizados con motivos de calaveras. Están diseñados para aquellos que desean llevar la estética de su moto personalizada al extremo más radical. Disponibles en versión flotante, al igual que sus otras versiones, cuentan con un tratamiento anticorrosión y están fabricados en acero inoxidable (AISI 420).

I dischi Galfer rotondi sono di design originale e presentano motivi personalizzati a forma di teschi. Sono progettati per coloro che desiderano portare l'estetica della propria moto personalizzata al livello più estremo. Disponibili in una versione flottante, come le altre varianti, sono dotati di un trattamento anticorrosione e sono realizzati in acciaio inossidabile (AISI 420).

BRAKE DISCS

CUBIQ® THE LIGHTEST

REF
Q

REF
FLQ

Galfer Cubiq® discs are the lightest discs in the entire range, achieving a reduction of up to 40% compared to the original discs. They enhance cooling and ensure even wear of the brake pads, positioning themselves as the most "high tech" discs in the custom category. The floating version features a stainless steel core (AISI 420). Both have cathodic electrocoating treatment to prevent corrosion.

Los discos Galfer Cubiq® son los discos más ligeros de toda la gama, logrando una reducción de hasta un 40% respecto a los discos originales. Mejoran la refrigeración y aseguran un desgaste uniforme de las pastillas, posicionándose como los discos más "high tech" en la categoría custom. La versión flotante contiene un núcleo de acero inoxidable (AISI 420). Ambos cuentan con el tratamiento de cataforesis para evitar la corrosión.

I dischi Galfer rotondi sono i dischi più leggeri dell'intera gamma, raggiungendo una riduzione fino al 40% rispetto ai dischi originali. Migliorano il raffreddamento e assicurano un'usura uniforme delle pastiglie dei freni, posizionandosi come i dischi più "high tech" nella categoria personalizzata. La versione flottante presenta un nucleo in acciaio inossidabile (AISI 420). Entrambi sono sottoposti a un trattamento di elettrodeposizione catodica per prevenire la corrosione.

BRAKE DISCS

NEW DISC WAVE®: COLOUR DISCS FOR THE CUSTOM WORLD

Galfer is launching its new Disc Wave® discs in six eye-catching colour finishes (red, blue, gold, orange, gloss black and CNC contrasting black) designed for fans of V-Twin custom motorcycles (Harley Davidson) who want to enhance the aesthetics and improve their bikes' braking performance.

The innovative GALFER DISC WAVE® coloured discs have undergone innovative colour anodizing treatment applied to the 7075 T6 aluminium centre, which not only gives them a distinctive appearance but also improves their visibility. The six eye-catching finishes (red, blue, gold, orange, gloss black and contrasting black) allow fans to personalize their bikes down to the smallest detail. Whether by combining the disc brakes with the colour of the motorcycle or improving the details, this new range of colours offers infinite possibilities to enhance the motorcycle's general appearance.

Designed to exceed the expectations of the most demanding bikers, Galfer Disc Wave® discs offer precise and efficient braking and a significant weight saving which means increased safety and control on the road.

Galfer lanza al mercado sus nuevos "Disc Wave®" en seis llamativos acabados de color rojo, azul, dorado, naranja, negro brillante y negro en contraste, dedicado a los amantes de las motos custom V-Twin (Harley Davidson) que quieren potenciar la estética y mejorar las prestaciones de frenada de sus motos.

Los innovadores "GALFER COLORED DISC WAVE®" cuentan con un avanzado tratamiento de anodizado de color aplicado al núcleo de aluminio 7075 T6 que no sólo les confiere un aspecto distintivo, sino que también mejora su visibilidad. Los seis llamativos acabados, en rojo, azul, dorado, naranja, negro brillante y negro en contraste CNC, permiten a los aficionados personalizar su motocicleta hasta el más mínimo detalle. Ya sea combinando los discos de freno con el color de la motocicleta o mejorando los detalles, esta nueva gama de colores ofrece infinitas posibilidades para elevar la estética general de la motocicleta.

Diseñados para superar las expectativas de los moteros más exigentes, los discos Galfer Disc Wave® ofrecen una frenada precisa y precisa y eficiente y un ahorro de peso importante que se traduce en mayor seguridad y control en la carretera.

Galfer lancia sul mercato i suoi nuovi "Disc Wave®" in sei accattivanti finiture cromatiche, rosso, blu, oro, oro, arancione, nero lucido e nero a contrasto, dedicati agli appassionati di moto custom V-Twin (Harley Davidson) che vogliono esaltare l'estetica e migliorare le prestazioni di frenata delle loro moto.

Gli innovativi "GALFER COLORED DISC WAVE®" vantano di un innovativo trattamento di anodizzazione del colore applicato all'anima in alluminio 7075 T6 che non solo conferisce loro un aspetto distintivo, ma ne migliora anche la visibilità. Le sei accattivanti finiture, in rosso, blu, oro, arancio, nero lucido e nero a contrasto CNC, consentono agli appassionati di personalizzare la propria moto nei minimi dettagli. Che si tratti di abbinare i dischi freno al colore della moto o di esaltarne i dettagli, questa nuova gamma di colori offre infinite possibilità di elevare l'estetica complessiva della moto.

Progettati per superare le aspettative dei motociclisti più esigenti, i dischi Galfer "Disc Wave®" offrono una frenata precisa ed efficiente e un significativo risparmio di peso che si traduce in una maggiore sicurezza e controllo sulla strada.

BRAKE PADS

G1054 - SEMI METAL ^(E₉) 90R

This compound embodies the past, present and future of semi-metallic production at GALFER. It has been manufactured for years with minor improvements, and it's still used today in several OE plants. The G1054 has an excellent coefficient of friction and low wear, offering progressive and effective braking. All these features make the compound suitable for all kinds of motorcycle.

Este compuesto representa el pasado, el presente y el futuro de la producción semimetálica en GALFER. Ha sido producida durante años con pequeñas mejoras y hoy en día aún la utilizan muchas plantas de OE.

Su excelente coeficiente de fricción, su bajo desgaste y su frenada progresiva y efectiva hacen que el G1054 sea un compuesto adecuado para los recambios de cualquier tipo de motocicleta.

Questa mescola rappresenta il passato, il presente ed il futuro della produzione semimetallica in GALFER. Da anni si produce questa mescola, sempre con piccoli miglioramenti, ed ancora oggi viene usata in vari impianti originali OE. Ottimo coefficiente di attrito, consumi contenuti, frenata progressiva ed efficace, tutte queste caratteristiche fanno della G1054 una mescola adatta al ricambio di ogni tipo di motociclo.

G1370/71 - SINTER STREET ^(E₉) 90R

Designed for road bike customers, G1370 is GALFER's OE product replacement. G1370 guarantees safe braking and is able to stand high temperatures without fade. Performance is not effected by adverse weather conditions. Combines safe and progressive braking with a competitive price.

Creada para satisfacer a los clientes de motocicletas de carretera, un recambio a la altura del producto original. Garantiza una frenada segura, no tiene problemas con las altas temperaturas (FADE) y en condiciones climáticas adversas no altera su rendimiento. Combina una frenada segura y progresiva con un precio competitivo.

G1370 creata per soddisfare la clientela che usa moto stradale, un ricambio che non teme paragoni con il prodotto originale. Garantisce una frenata sempre pronta e sicura, non teme le alte temperature d'uso (FADE) e non altera le sue prestazioni in condizioni atmosferiche avverse. Abbina una frenata sicura e progressiva ad un prezzo competitivo.

G1375 - SINTER SPORT ^(E₉) 90R

An upgrade of G1370 designed to satisfy the most demanding customers who, besides the usual urban use, have a taste for sport riding. This compound has a high coefficient of friction and ensures excellent performance even at high temperatures. G1375 offers adjustable and safe braking under all conditions.

Una mejora de la G1370, diseñada para satisfacer a los clientes más exigentes que, además del uso urbano habitual, desean una conducción más deportiva. Este compuesto, con un alto coeficiente de fricción, garantiza un rendimiento excelente incluso con altas temperaturas de uso. La G1375 ofrece una frenada modulable y segura en todo tipo de condiciones.

Un upgrade della nostra G1370 studiata per soddisfare la clientela più esigente che oltre all'uso normale cittadino vuole usare il proprio mezzo in maniera più sportiva. Questa mescola dall'elevato coefficiente di attrito, garantisce prestazioni eccellenti fino alle più alte temperature d'uso. Frenata modulabile e sicura in ogni condizione sono la caratteristica principale della G1375.
